

Owens Pump & Equipment

Your source of premier industrial, municipal pumps and equipment! Representing the following product lines for Oregon, Washington, and Idaho:

Since 1929, Vogelsang has been a market leader in industrial, and municipal products. Engineered to Work!

- Rotary Lobe Pumps
- In-Line Macerators
- Twin Shaft Grinders
- Solids Reduction Systems

For over 50 years, Crane Pumps & Systems is a world-class manufacturer of pumps & equipment.

- Split Case / End Suction
- Submersible
- Low Pressure Sewer
- Grinder Pumps

For over 80 years, Albin has been manufacturing high quality peristaltic hose pumps for the municipal market.

- Up to 650 GPM
- No Mechanical Seals
- Self-Priming
- Dry Running

Barnes has created the ultimate Chopper pump. The only design on the market with a fully open center impeller design:

- Plug & Play Cables
- White Iron Impellers
- Standard Seals
- Hardened Blades

Their package products provide simple and low cost solutions such as:

- Flumes
- Shelters & Enclosures
- Manholes
- Weirs

Packaged & Modular Membrane Wastewater Treatment Plants

- MemPac™ MBR Plants
- Membrane Thickeners
- PrimePac™ Plants
- DryPac™ Dewatering
- HeadPac™ Headworks

Since 1980, DDI has been a leader in energy recovery and heat transfer products. Their patented "Rectangular, Square, Cube" design is compact, efficient, and doesn't plug!

- Heat Exchangers
- Boilers

TKM Industries manufactures high-quality, custom- metering pumps utilize a modular design using common components across the product line.

- Mechanical Diaphragm
- Hydraulic Diaphragm
- Plunger

Since 1983, they have manufactured odor control equipment to remove H₂S from treatment plants, collection systems, and much more. They can also provide manhole scrubbers.

Progressive Cavity Pumps with quality, and savings for your applications.

- Moyno Parts
- Drop in Replacements
- Compact, and dosing
- Open Throat Cake Pumps

OR-TEC has been a specialized manufacture of wastewater equipment for almost 40 years.

- Belt Press / Thickeners
- Screw Press
- Screens / Headworks
- DAFT
- Polymer Dosing

Variable speed driven constant pressure systems with your preferred pumps! Booster packages are PLC based and fully customizable!

- Vertical or Horizontal
- 304 Stainless Const.

The FOGRod concept is extremely simple. This is the best way to increase system reliability. No calibration, no software, no laptops required. Just hang the FOGRod in the wet well (no need to go down into the wet well, no stilling tube needed), clip the LIT in the panel, and connect the FOGRod.

For over 70 years they have been manufacturing pumps for solids and air/gas entrained fluids to extend the overall life in these applications. The Turo series pumps come in Vortex, Semi-Open, and Elbow.

Owens Pump & Equipment

Product Highlights!

BARNES®

by **CRANE** PUMPS & SYSTEMS

Pressure Sewer System & Upgrade Replacement Cores

Barnes Pressure Sewer System offers a solution to the residential market for new or existing sewer needs. The EcoTRAN™ Grinder Pump System preserves groundwater ecology by collecting and grinding residential sewage in an underground basin and transmitting the waste under pressure to a remote private or municipal waste treatment plant. The unit is easily installed and maintained as well as aesthetically pleasing.

Also Available:

The reliability and longevity of centrifugal grinder pumps is available in an Upgrade Core package that fits directly into E/One® 200, 2000, Extreme Series basins as well as most other lower pressure sewer pump providers. The centrifugal technology outperforms Progressing Cavity technology.

SITHE

BY BARNES®

Submersible Chopper Pumps

SITHE chopper pumps solve clogging with an innovative, unique, first-of-its-kind, patented chopping technology that slices even the most troublesome solids in wastewater. SITHE chopper pumps easily chop and pass solids like plastic bottles, wipes, mop heads, rags, nylon rods, wood dowels, baseballs, pillows, glass, and literally any solid in the waste stream. Available in both standard and explosion proof designs, SITHE chopper pumps are offered from 3HP to 150HP in 3" to 10" discharge sizes.

Features:

- Open Center Cutter Design
- Field Replaceable Heat-Treated Blades
- Plug-n-Play Cords
- Optional White Iron (NiHard) Impellers

Introducing FOGRod Level Control!

FOGROD

SEES THROUGH FOG LIKE NO FLOATS CAN

A simple solution for fouling floats, transducers and fussy ultrasonic level controls. No moving parts, provides a solution that has features and not disadvantages.

- Alarms when cleaning is needed
- Simple installation & cleveland
- Impossible to run pumps dry!
- Easy to understand like ball floats.

Simplify your wet well with FOGRod with a free trial.
